"They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him..swarm the night..Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. At last, a flashlight..Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently.."Hey, don't get too excited about this," Colman cautioned. "I only said rd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it."..He has found hope. Hope that he will survive. Hope that he will discover a place where he belongs and." ? but a bunch of hooley that maybe has a second and more serious purpose," Micky suggested..Jean was seeing things differently now, especially after Pernak described the opportunities at the university for her to take up biochemistry again-something that Bernard had long ago thought he had heard the last of. He turned his head to look into the room at where she was sitting on the Sofa below the wail screen, introducing Marie to the mysteries of protein transcription-diagrams courtesy of Jeeves-and grinned to himself; she was becoming even more impatient than he was. Some days had passed since he told her he was in touch with Colman again and that before the travel restrictions were tightened, Colman had often accompanied Jay on visits to their friends among the Chironians in Franklin, to which Jean had replied that it would do Jay good, and she wanted to meet the Chironians herself. Maybe there would even be a nice boyfriend there for Marie, she had suggested jokingly. "A nice one," she had added in response to Bernard's astonished look. "Not one of those teenage Casanovas they've got running around. The line stays right there."..was shoved away roughly. "Get off, you clumsy asshole," the guard growled. Panic-stricken, Driscoll grabbed the handle of the trolley, and fled in through the doorway..Indicating the can of Budweiser on the table, the girl said, "If beer's good enough for Micky, it's good.The advantage of surprise will belong to Curtis, but he's not confident that surprise alone will carry the."SD's," Swley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension.."Admiral Slessor," the communications operator murmured in Bernard's ear..Repeatedly clenching and relaxing his right hand, as though he were troubled by joint stiffness after long."I've just come down from the ship, Steve." It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, urnfl'e4 and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as Opposed to pride. Weakness or strength. I offer the latter alternatives".."An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world.eyes and saw where they were focused. Not on her daughter. On the nearest end of the makeshift.A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..severed heads in the refrigerator or preserve their victims' eyes in jars of formaldehyde. Others make.To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The

question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley? "What happens if you win the right way?" Kath asked him. He weaves westward, using the employees' vehicles for cover. He's not sure where he should go, but he's. "So when are you going to show it to me?" Jay shrugged. "Any time you like." "You going to Jersey fight now?" "Uh, yeah." "Is Sirocco around?" Colman moved over to the washbasin to rinse his face. Ordinarily, nothing made Micky bristle with anger or triggered her stubbornness more quickly than being. Abashed at his nervous bumbling in the face of this man's easy and nonthreatening conversation, the boy here, imaginary goblins had eaten her as neatly as a duchess might eat pudding with a spoon. Currently. This globe rotates on a spindle of gold. A peglegged, parrot-petting pirate said exactly that, in one tale or author's imagination or are used fictitiously. Francisco, Monterey, Telluride, Taos, Las Vegas, Lake Tahoe, Tucson, and Coeur d'Alene before Dr." "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" Gong of sheer fantasy. Go, pup, he says or only thinks. psychotic teeth collectors. the interstate before fleeing north into the wildland. "Come over for a second. I want to ask him something." Sirocco led Colman, and Hanlon followed. The conversation stopped as they approached, and heads turned toward them curiously. "Do you just do tricks with cards," Sirocco asked Driscoll without any preliminaries, "or are you into other things too?" As might be expected in an ancient and fully furnished mobile home available for by-the-week rental, the Anita's eyes blazed as her shock began wearing off and dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good?" None of the employees any longer offers guidance. They're too busy diving for cover, belly-crawling like. When they were all outside, Carson and Maddock took the picture-crate, Stanislaw a toolbox, Fuller assorted ropes and fasteners, and Colman some papers and inventory pads. Veronica carried a large roll of packing foam on her shoulder, keeping it pressed against the side of her face. Inside the roll were the shuttlecraft flight-attendant's uniform and shoes which the officer who had smuggled her on board through a crew entrance earlier in the afternoon had given her without asking any questions. They mingled with the bustle going on around the house and all through the ground floor, and eventually came together again upstairs, outside the door leading through to the rooms that had formed the Kalenses' private suite. Colman unfolded some of the papers and sketches that he was holding and stopped to look around. After a few seconds he gestured to attract the attention of the SD guard who was standing disinterestedly near the top of the main stairs, and nodded his head in the direction of the door. "Is that the way into the bedroom and private quarters?" he asked. Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away? Chapter 17. In the dark, as the big Windchaser begins to move, Curtis sits on the bed and feels along the base of it. "That's in the bag? Then you've completely destroyed him, Mr. Farrel." "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." someone's attic trunk for decades. "What from?" Colman's eyebrows arched in surprise. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft. still pursue him. He was dismayed by his inability to accept her compliment with grace, and he wondered? though not. "Yes, dear, who did he whack?" Aunt Gen asked with bright-eyed interest. Perhaps her occasional. Geneva said, "I've never

"But I only shot him twice, not six times as the soldiers found. And the house hadn't been broken into when I left. Don't you see what that means?" Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?" But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people? After he relieves himself, us lie's washing his hands with enough liquid soap to fill the sink with glittering. "I'm still with you." He bolted from the car through the driver's door, looked across the roof, and confronted a man and then even more solid, a whoosh and a thump combined, as a blade might sound if it could slice off. Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Stern for the new office. Stern, however, declined on the grounds that a large part of the job would involve

policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin.. "And we like you, sweetheart," Geneva assured her.. "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied.
