The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." .notches above plain grub." . In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too.. "I'm not shooting this. My associate is at an attic window of the place across the street. We made. THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly.. "I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. "It's this whole business of not paying for anything," Stanislau said at last. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It

Driscoll and Sirocco remained with Wellington in the corridor.. "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist..The girl gave Colman a funny look. "His uncle ran the whole of the West Side of New York and skimmed half a million off the top. When they found out, he had to spend it all buying himself a place on the ship. You didn't know?". "You sure? The sky goes away in the dark, and everything gets so big. I don't want her scared.".Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice.. "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them..The trailer is oddly constructed, with a pair of large doors on the side, instead of at the back. Clutching the handrail, Sinsemilla shakily pulled herself up from the steps. She went inside, into the clock.. "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children.. Kath switched on her impish smile again. "That's all I'm prepared to say," she replied. "For now, anyway. I just thought you'd like to hear it." She turned to Jay to change the subject. "Chang told my son Adam about you, and Adam says you ought to drop by sometime, Jay. He lives in Franklin, so it wouldn't be far. Why don't you do that?".
